Dance and music, pulsing rhythm, only a few words, and our emotions.
Upon opening the magic drawer, there is an explosion of feelings !
Joy, sadness, fear, dazzlement, anger.

Two women, two girls, two fairies, straight out of a fantastic universe, are
discovering, within sounds, lights, and movements, the power of their mirror neurons.

They learn, exchange, share with the audience, bouncing off their emotions.
With a sob or a burst of laughter. Showing their teeth, or eyes round as saucers.
One over here, one over there, to meet each other in joy.
Or, with a hug, to support each other in the face of melancholy.

A journey on the field of feelings and humanity.
A little walk around Empathy, to mix our neurons.
A magic Mirror.
